

BRYDEN JOHNSON

Original Works

Service beyond the Balance Sheet

At Bryden Johnson, we're about as far away from the traditional image of the 'human calculator' as it gets. Talented business advisers are on hand to keep you compliant with the very latest legislation. We'll actively work with you to enhance your systems and processes. And above all, we're here to give you the timely and meaningful management information that you need to drive the future direction of your business. With our fixed fee tariff, it all adds up to being a service that represents superb value - with no hidden surprises.

Financial Accounts

We prepare annual and periodic accounts for you to report the performance and financial position of your business. These documents consist of a Profit and Loss Account, Balance Sheet and detailed notes and analysis of costs and overheads.

Regulatory Compliance

The law, like business itself, never stands still. Whether you are running a Limited Company, Partnership, Limited Liability Partnership or are a Sole Trader, we make sure you are always compliant with the relevant legislation and act on any changes promptly.

Management Accounts

Regular financial reports are essential for you to maintain control over the finances of your business and to ensure that it is trading profitably. We highlight variations and trends, giving you up to date information and incisive analysis on which you can base your decisions with real confidence.

Key Controls and Reconciliations

With Bryden Johnson, nothing is left to chance. You have the peace of mind of knowing that all the important checks, controls and reconciliations are in place. We also review your accounts for accuracy and reasonableness based on our in-depth knowledge of your business.

Budgeting and Forecasting

As well as a close understanding of your business, our advisers have amassed a great deal of experience across a variety of sectors. They are therefore well-qualified to advise on the compilation of sales, cash flow and profit budgets and forecasts. We'll compare these predictions with actual performance figures to keep you on track with your business.

Pro-active Specialist Advice

We empower you with all the decision-making processes of a modern business. You have direct access to a dedicated experienced accountant who will get to know you and your business and will be on hand to help you deal with issues as they arise. By extension, you can also count on advice from specialists in different disciplines within the firm as and when you need it.
